

# FQHC IMPROVES QUALITY PERFORMANCE THROUGH ENHANCED PRODUCTIVITY AND STAFF ENGAGEMENT

Community Health Centers of Central Wyoming needed to boost productivity and increase staff engagement to meet their quality goals.

## OVERVIEW

Community Health Centers of Central Wyoming (CHCCW) was struggling to achieve success in their quality programs. With an overburdened staff and high demand for their services, this Federally Qualified Health Center (FQHC) needed assistance to integrate quality measures into their daily workflows. They enlisted Medical Advantage Group to help prioritize their quality measures, streamline clinical workflows, and train office staff and providers.

## CHALLENGES

- Lack of staff and provider awareness of the 19 quality measures CHCCW was working on.
- Inefficient workflows that required time consuming and duplicative data entry processes.
- Missed opportunities to close gaps in care to meet quality measures.

## SOLUTION

Medical Advantage Group's practice consultants spent time on-site observing the daily operations and implemented a solution that incorporated:

- **EHR Optimization** – including custom templates and order sets to streamline data entry and capture the required quality measures in the system.
- **Care Gap Alerts** – to help staff clearly identify which patients needed a quality measure completed during their visit.
- **Face-to-Face Training** – to educate staff about the quality measures and clinical workflows, and to gain buy-in for the new processes.
- **Quick Reference Guides** – to reinforce the training and solidify new workflows.

## RESULTS

After eight weeks working with Medical Advantage Group's practice consultants, the team at CHCCW achieved the following:

- Increased staff and provider knowledge of quality measures and how to achieve them.
- More efficient workflows within their EHR system, allowing staff and providers to dedicate more time to patient care and less time to paperwork.
- Improved coordination and communication regarding patient care and needed quality measures to be completed during each visit.

**“With the assistance of Medical Advantage Group, we here at CHCCW were able to streamline processes, increase quality metrics, decrease unnecessary documentation, and deliver better patient care. Our staff and providers are now more efficient than ever and feel satisfied that they are giving patients the care they deserve.”**

Kristal Skiles, RN Director of Nursing and Quality,  
Community Health Centers of Central Wyoming
